

2.5. LoRaWan communication

When enabled the data will be sent using LoRaWan protocol.

You can manage you own Lora network or ask eLichens to provide you with support.

When using eLichens cloud as the Lora application we will store the data and let you access it through:

- eLichens backend with plots and dashboards.
- eLichens Aura Mobile application with plots and dashboards.
- eLichens API: <https://lab.elichens.com/doc/api#tag/Air-Quality-Station>

2.6. eLichens Cloud with LoRaWan

You can use the LoRaWAN network of your choice but eLichens can provide you a complete solution on our cloud: we will store the Aura-CO₂ data for you and give you out of the box:

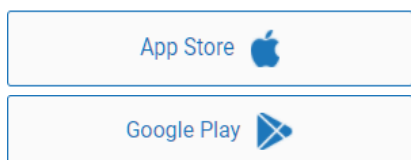

Insightful dashboards and plots

Unlimited access to your data through our API

2.7. Mobile Application

Download our mobile application from iOS and Android:

With this application you can:

- Configure your devices with BLE,
- Display data logs from eLichens cloud

3. Ordering information

Below are listed the different versions with their corresponding part number:

Part Number	Specific configuration
AURA10LF221-EU	LoRa- Europe
AURA10LF221-AS	LoRa-Asia
AURA10LF221-US	Lora-US
